

# H J DOSHI HOSPITAL

*Trusted Health Partner Since 1989*

---

## INTRODUCTION

---

As a result of a dream embodied by our founder trustee and great philanthropist, the late Shri Harilal Jechand Doshi, the H. J. Doshi Hospital Trust was established in 1979. The objective of the hospital was, in our founder's words, "To offer the best medical treatment available to the people of Saurashtra."

The H. J. Doshi Hospital stands as a pillar of medical excellence, making superior healthcare accessible to every individual in need. Over the decades, we have been committed to our core values of transforming the health landscape of Rajkot and Saurashtra with our full-time specialists equipped with state-of-the-art facilities that enable them to provide exceptional care.

Our goal is to provide medical services to all sections of the society at highly economical rates on a non-commercial and charitable basis with the intention of serving humanity.

With a built-up area of more than 1,80,000 sq. ft., the hospital has 200 functional beds along with a full-fledged pharmacy (under the name of Pujya Samarathben Harilal Doshi Sarvajani Medicine Centre), making it the most robust healthcare facility in the region. The multi-specialty tertiary care hospital is designed to cater to the comprehensive healthcare needs of the entire Saurashtra region. It is backed by a world-class team of doctors, the latest infrastructure, next-generation technology, 24x7 emergency services and superior post-operative care.

### Expansion and Entry into an Ultra-Modern Era

H. J. Doshi Hospital and Medical Research Centre carries forward Shri Harilal Doshi's foresight for excellence in care and service to all by means of renovating the infrastructure, refurbishing the interiors, improving the ICU and operating rooms and upgrading to modern equipment and technology.

We continue to expand our facilities, which include the first 3-Tesla MRI machines in the region, a recently installed ultra-modern Cath Lab for Angiography, Angioplasty and Neurology DSA procedures, fully equipped modern surgical suites, and contemporary and innovative emergency care facilities. We are also in the process of installing specialty operating theaters for higher-end surgeries. Today, we can offer the most modern medical interventions with quality standards that are on par with any hospital in the world.

Our mission is to be a beacon of hope and healing to one & all by being a wholistic, affordable and quality healthcare institution that combines the best medical treatment with strong ethical principles and a culture of care and compassion.

#### **Vision:**

At the H. J. Doshi Hospital, we blend cutting-edge technology with the warmth of human touch, fostering an environment where every life is valued and every patient is treated with dignity and respect. We aim to uplift community wellbeing, promote health equity and set new standards in patient care through excellence, innovation, and a relentless pursuit of improving lives.
